Professional Summary

UX Researcher and Product Designer with 3+ years of experience combining qualitative and behavioral research, usability testing, and product ownership across travel, mobility, and immersive technology. I turn ambiguous product questions into evidence-based priorities and product decisions that balance user needs, business goals, and technical feasibility.

Key Skills

Qualitative Research	Semi-structured Interviews	Usability Testing	Behavioral Research
Discovery Research	Desk Research & Surveys	Research Synthesis	Hypothesis Framing
UX Audits	Product Discovery	Roadmap Prioritization	Stakeholder Alignment
Figma & FigJam	Workshops	Claude & ChatGPT	Framer
Jira, YouTrack & Notion

Work Experience

The Wise Dreams - UX Researcher / Product Owner **Oct 2024 to May 2026**

- Ran usability and behavioral research for VR navigation on Meta Quest 3, segmenting participants by technological familiarity rather than age and identifying the actual adoption barrier.
- Translated observed behavior and research findings into interaction, navigation, onboarding, and product-priority decisions across VR and Web initiatives.
- Managed the roadmap, backlog, and acceptance criteria with a 10-person multidisciplinary team working in 10-day Scrum cycles, aligning user evidence, business objectives, and technical feasibility.

Agile Monkeys - UX Researcher - Freelance **Mar 2024 to Apr 2024**

- Conducted discovery research for a Discogs-based AI recommendation concept and challenged the initial solution hypothesis.
- Reframed the opportunity around reducing shipping costs, redirecting the roadmap toward grouped purchases and a more relevant, evidence-backed value proposition.

Smartvel - UX/UI Designer **Jan 2023 to Sep 2023**

- Ran UX audits on B2B travel products, identifying usability issues and translating them into prioritized design improvements.
- Designed responsive MVP widgets and supported quarterly releases for airline clients including Vueling, Iberia, British Airways, and Singapore Airlines.

Talks

"Cappy - Smart Parking to Reduce Urban CO2 Emissions" - [Ecohackathon Itainnova, Zaragoza](#) **Oct 2023**
Presented the research behind Cappy, framed around optimizing car usage in cities - one of the 21st century's major urban mobility challenges - to reduce private-car dependency and its environmental impact.

Shipped

Selected research projects

- **Pujobaixo** - Researched and designed a carpooling platform between Barcelona and the Berguedà, translating driver and passenger barriers, motivations, and trust needs into product and behavioral design decisions.
- **Cappy** - Won 1st prize at the ECOhackathon Itainnova after conducting desk research and interviews on shared parking to reduce private-car use and environmental impact in urban areas.

Education & training

- **Behavioral Design Bootcamp** - Dani Solana, Madrid, 2025; **Product Designer Bootcamp** - Northcamp, Madrid, 2023.
- **UX Research** - Coderhouse, 2022; **Web Project Direction and Management** - Elisava, Barcelona, 2016.
- **Art and Communication** - Universitat de Barcelona, 2008-2013.
